

Centre for Smart Product Rapid Product Development

Practical solutions for *business*

Do you have an idea for a new product but need help to develop it? Then give us a call, as we would like to roll up our sleeves and be part of your team.

Since 2004, WelTec Connect's Centre for Smart Product has been supporting product developers to create exciting new products.

The Centre links you into the specialist expertise and facilities of the Wellington Institute of Technology's Schools of Engineering, Information and Creative Technologies. These can assist with:

- ♦ development of the product concepts which can include hardware, software and / or services
- ♦ prototyping of concepts
- ♦ testing of concepts
- ♦ development of production-ready product

What the students lack in experience is made up for by their enthusiasm, fresh ideas and up-to-the-minute technical skills.

As well as giving these students valuable work experience, you also get the chance to get to know them.

We know from companies that have worked with our students this way that they found it a very useful way of discovering potential employees.

So have a look at our information sheets for more detail of our facilities. Then give us a call.

Paul Mather

Director Technology Development & Transfer
Centre for Smart Product

Phone: +64 4 920 2763

We would welcome an opportunity to show you around and discuss your project.

“ WelTec undertook the conversion of the concept very efficiently, producing a design and drawings that met the required performance specifications and which were able to be used for manufacture. They were also able to manufacture the first prototypes in their workshops. ”

Malcolm Woods M.E. M.B.A. FIPENZ

Director, FasTec Ltd

Winners of the 2010 New Zealand Engineering Excellence Award for Energy Systems.
